

# ERGO COMFORT ARCH<sup>®</sup>

Therapy Platforms<sup>®</sup>

Anti-Fatigue Footwear Insoles

Patent #7913423 & other patents pending

## Ergo Comfort ARCH Shoe Insole

### Arch Support

Anatomically designed arch provides support and stability.

### Performance Cushioning

Full length **Ergosert™ technology** layer is laboratory certified to provide superior cushioning to fight fatigue.

### Anti-Blister Top

Keeps feet cooler, drier, & less prone to fatigue and blisters.

**Price USD: \$ 42.95**

- **Extra Support System**

The anatomically shaped arch support and heel cup combine to deliver extra support and stability.

- **Fatigue Fighting Cushioning ★★★★★**

**Ergosert™ technology** is laboratory certified to have the same ergonomic properties as premium industrial anti-fatigue matting. **Ergosert™** material is lightweight and durable, it does not harden like PVC foam, does not breakdown like latex foam or take a compression set like EVA foam.

- **Ergonomic Tuned Cushioning**

Ergonomic tuned cushioning is based on foot size and weight.

- **Anti-Blister Top Cover**

By controlling the amount the foot slides across the insole's surface, the anti-blister top cover helps prevent blisters and keeps feet cooler & drier.

- **Fights Odors**

The **Ergosert™** antimicrobial in the top cover helps keep the insole top odor free.

- **Versatile Fit and Use**

**Ergobuddy®** insoles will fit boots, hiking, casual, and athletic shoes. They are performance insoles to be used all day for standing, walking, or running.

PVC & Latex Free Insoles

Fitting: Remove the existing insole and slide the new Ergo Comfort Insoles into your shoes. If your new insoles need to be trimmed, use a pen and trace the old insole's shape (fore-foot part only) on the bottom side of the new insole. Carefully cut the new Ergo Comfort insoles with scissors and place them in your shoes.

**Ergobuddy®** and **Ergosert™** are trademarks of Johnson Technologies Corporation.
