

Therapy Platforms® Anti-Fatigue Footwear Insoles

(Patent Pending)

ERGOBUDDY®
The Wise Choice

Performance Advantages ★★★★★

Ergosert™ technology is laboratory certified to have the same ergonomic properties as premium industrial anti-fatigue matting. Ergosert™ material is lightweight and durable, it does not harden like PVC foam, does not breakdown like latex foam or take a compression set like EVA foam.

Features and Benefits...

- ◆ **Superior Fatigue Fighting Cushioning ★★★★★**
Superior resiliency and comfort compared to leading brand insoles in laboratory tests with over twice the durability and life span.
- ◆ **Ergonomic Tuned Cushioning**
Ergonomic tuned Cushioning is based on foot size and weight providing pre-engineered comfort.
- ◆ **Extra Deep Heel Cup**
Helps cushion the foot naturally, utilizing the cushioning tissues in the heel of the foot.
- ◆ **Tapered Toe Design**
Provides better fit in all shoes.
- ◆ **Air Flow**
Vents molded into the shape of the arch help move warm air out and draw cooler air into footwear.
- ◆ **Anti-Blister Top Cover**
By controlling the amount the foot slides across the insole's surface, the anti-blister top cover helps prevent blisters and keeps feet cooler & drier.
- ◆ **Versatile Fit and Use**
Ergobuddy® insoles will fit boots, hiking, casual, and athletic shoes. They are performance insoles to be used all day for standing, walking, or running.
- ◆ **Fights Odors**
The Microzap™ antimicrobial in the top cover helps keep the insole top odor free.

Superior Quality

Johnson Technologies Corporation warrants **ERGOBUDDY®** products to be constructed with top quality design, materials, and workmanship, satisfying the highest industrial standards. **ERGOSERT technology™ - MADE IN THE USA**
